

## Recognition of export excellence

Specialist RIB and luxury pleasure boat builder, Rayglass Boats has been recognised with a prestigious Exporter of the Year Award for Auckland and Waikato regions.

Rayglass Boats has again been recognised, this time as the winner of one of the most prestigious categories of the Air New Zealand Cargo ExportNZ Awards for Auckland and Waikato regions.

Well-known in the New Zealand market and internationally as a leading manufacturer of fast inflatable powerboats and luxury pleasure boats, Rayglass Boats was confirmed as the winner of the BDO Exporter of the Year (export revenue \$1 million to \$10 million) category at the awards held in Auckland 23 June. The awards, presented by the Hon. Steven Joyce, reward companies that help to grow and transform the New Zealand economy by achieving exceptional export success.

Rayglass chief executive officer Dave Larsen says: "At Rayglass, the quality of our product and operations is defined by the customer. Our success depends on creating the right experience, regardless of whether our customers are right next door or 12,000 miles away."

## SPIN DOCTOR

Who wouldn't want to make the most of onboard spaces and take full advantage of the ever-changing vistas from the yacht?

A clever new product from Netherlands-based company V-Technology, the Rotating Sofa, can transform your saloon into a cinema or quickly set it up for socialising. It allows owners to choose to combine the separate semi-circular parts into one big sofa or arrange them in a different position.

The system is custom-built according to the design of the customer's sofas, and no rails or other driving gear are visible. In combination with the brand's Rotating Floor, which has a very low built-in depth, the system can be installed almost anywhere on the yacht. The electrical motors with brakes will keep the sofas in place when the yacht is rolling and pitching. The price for a Rotating Floor is approximately \$80,000
