

V-Technology Rotating Sun Awning, for Your Sundeck

APRIL 7, 2015 MELISSA CAHILL

Sun-worshipping is part of the superyacht lifestyle. Sometimes, though, you want a little shade but don't want to have to leave your friends and family who are still lounging. That's where the rotating sun awning by V-Technology comes into play.

V-Technology, which makes a few superyacht-specific solutions, has already delivered a rotating sun awning to at least one yacht client. Due to confidentiality, a photo is not available. Regardless, the stylish shade was custom-designed and -built to suit that particular yacht's needs. V-Technology does the same for all clients, whether you want the awning for a hot tub or sunpad.

The fabric used for the sun awning, selected according to your desired color scheme, is supported by polished stainless steel tubes. The base is also stainless steel, painted to match the surrounding area on your sundeck. V-Technology further employs hydraulics to allow the awning to rotate, letting you lounge around as long as you wish. Equally important, the shade automatically folds in if winds exceed a certain speed that you specify, up to 30 knots.

Also if you wish, V-Technology will install custom lighting and an audio system. You and your guests can control these via iPhone or iPad, too.

Delivery time is approximately 12 weeks. A non-rotating sun awning is also available from V-Technology.
